

PROTESTS BY WOOL GROWERS WILL FALL

Efforts to Block Imports of Australian Wool Are to Be Ignored.

Raw Silk to Be Laid Down at Old Place

As the result of negotiations conducted by large silk importers and the Interstate Commerce Commission, the Interstate Commerce Commission has arranged to restore the deliveries of raw silk from the Pacific coast to St. John's Park, in the vicinity of Hudson and Laight streets.

Because of congestion resulting from war conditions, an order was issued last year which transferred the deliveries of silk from St. John's Park to Pier 72, North River. This action caused great inconvenience and additional expense to the silk importers, because the Pier 72 was removed from the silk warehouses.

Special Dispatch to The Sun. WASHINGTON, Aug. 26.—That another conference will be called soon between Government officials, officials of the British Embassy and representatives of the Woolen and Worsted Manufacturers Association, at which time, it is believed, final arrangements will be completed to allow the return of the wool purchase needed Australian wool, is indicated by reports current here.

Whether or not the conference will be held prior to the return of the wool purchase to Washington, which is scheduled for September 1, has not been announced.

Opposition to the plan is still being raised by Western wool growers, but it is not felt that the opposition is of sufficient strength to develop Congressional action. The probable plan will be to bring the wool to the docks at this as the most practical method.

Wool growers' associations in several States have protested to their respective legislatures in Congress against the proposed action. These protests are similar to the protests voiced by the National Association of Wool Growers in response to telegrams, members of the House took up the matter with Executive Department officials, who explained that there was no embargo on wool imports and that the British Government desired to do so it could send as much wool here as it could sell without violating any restrictions.

Visit of Japanese Silk Expert.

Dr. Kagiya, director of the Sericulture Experimental Station of the Japanese Government, is due to arrive in New York this week, according to advice received by the Silk Association of America.

He is coming to America by order of the Japanese Government and it is expected that he will visit the various silk associations in the United States in his efforts to work out a solution of the problems surrounding a standard classification of raw silk.

Brooklyn Industrial Exhibit.

Formal announcement is made that plans have been completed for the holding of the 1920 annual Brooklyn Industrial exhibit in the Twenty-third Regiment Armory, the National Academy of Art, Saturday, April 10, and continue for one week and possibly for a second week.

The 1919 annual exhibit was conceived by practically every exhibitor and visitor to be the greatest business yet gotten together in Brooklyn, and the completion of present plans are the outcome of negotiations that started prior to the close of the recent show. H. K. Hall, who managed the 1919 show, again will be the guiding spirit. The advertising, publicity and general supervision will be made under the direction of P. J. Flannery.

Large Shipments of Russian Furs.

That shipments of furs from Russia are being received in New York in increased quantities is indicated by reports in the local market. Dealers here report that approximately 1,250,000 squirrel pelts were received from Russia in the last few weeks.

To Standardize Contracts.

In order to standardize contracts in the silk industry and make it clear to new purchasers that orders will not be cancelled or prices readjusted, the executive committee of the Broad Silk Manufacturers of the United States, Division of the Silk Association of America, has recommended that silk manufacturers send a communication to this effect to their trade.

Knit Goods Prices Going Up.

Efforts of legislative and industrial bodies to lower the high cost of knit goods are doomed to fail so long as labor increases the cost of production, according to the Knit Goods Manufacturers Association and Underwear Manufacturers. Prices are said to be in the other direction.

It is reported that there is multiplication of evidence of a scarcity of many of the knit goods, such as merchandise which is as difficult to obtain a few months later as most lines were several weeks ago, before the war. The psychological influence of an unorganized movement to revamp the law of supply and demand.

Export business is said to be playing a more important part in the maintaining of high prices here than many persons suspect.

Garment Salesmen Elect Officers.

Arthur J. Lewy has been elected president of the Garment Salesmen's Association. Other officers elected at the annual meeting were: William A. Siegel, first vice-president; William A. Siegel, second vice-president; Sol Wolstein, secretary; Maurice H. Mann, treasurer.

Express Rolling Over.

An effort is to be made by the Millinery Chamber of Commerce of the United States to secure a rehearing before the United States Railroad Administration to present certain facts in connection with the proposed regulation of the American Railway Express Company, which provide for the use by shippers of outside containers of different shapes. The various trade organizations fought the proposition for several weeks and the committee in charge reported last week that the fight had been won as the Railroad Administration had agreed with the express company.

The millinery trade will voice its objections particularly against the proposal that containers must be made of straw-board of 175 pounds test, the contention of the hat manufacturers being that a board meeting a test of 140 to 150 pounds is sufficiently heavy.

Shirt Production Cut.

That the production of men's shirts has been seriously affected as a result of labor difficulties that many manufacturers will be in a position to do.
